PROJECTS

- Pink Calculator is a graphical application developed in C# using the Windows Forms (WinForms) library. The application provides basic functionality for performing simple arithmetic operations - addition, subtraction, multiplication, and division.
- Weather App is a C# Windows Forms desktop application designed to display real-time weather conditions using the OpenWeatherMap API.
- File Manager is a graphical desktop application developed in Java using the Swing library. The program allows users to browse directories, view disk partitions, open and read text files, as well as perform basic file operations such as renaming and deleting files.
